## Acronyms

Acronym	Definition
FGDC	Federal Geographic Data Committee
GDA	Geospatial Data Act
LCA	Lead Covered Agency
NGAC	National Geospatial Advisory Committee
NGDA	National Geospatial Data Asset(s)
NSDI	National Spatial Data Infrastructure
OMB	Office of Management and Budget
OS	Office of the Secretariat
<b>FGDC Agency Acronyms</b>	<b>Department and Agency</b>
DHS	Department of Homeland Security
DHS-FEMA	Department of Homeland Security, Federal Emergency Management Agency
DOC	Department of Commerce
DOC-Census	Department of Commerce, Census Bureau
DOC-NOAA	Department of Commerce, National Oceanic and Atmospheric Administration
DOD	Department of Defense
DOD-A&S	Department of Defense, Acquisition & Sustainment
DOD-USACE	Department of Defense, U.S. Army Corp of Engineers
DOI	Department of the Interior
DOI-BIA	Department of the Interior, Bureau of Indian Affairs
DOI-BLM	Department of the Interior, Bureau of Land Management
DOI-BOEM	Department of the Interior, Bureau of Ocean Energy Management
DOI-BSEE	Department of the Interior, Bureau of Safety and Environmental Enforcement
DOI-FWS	Department of the Interior, U.S. Fish and Wildlife Service
DOI-NPS	Department of the Interior, National Park Service
DOI-USGS	Department of the Interior, U.S. Geological Survey
DOS	Department of State
DOS-IBC	Department of State, International Boundary Commission
DOS-IBWC	Department of State, International Boundary and Water Commission
DOT	Department of Transportation
DOT-BTS	Department of Transportation, Bureau of Transportation Statistics
DOT-FAA	Department of Transportation, Federal Aviation Administration
GSA	General Services Administration
HUD	Department of Housing and Urban Development
NASA	National Aeronautics and Space Administration
USDA	U.S. Department of Agriculture
USDA-FSA	U.S. Department of Agriculture, Farm Service Agency
USDA-NASS	U.S. Department of Agriculture, National Agricultural Statistics Service
USDA-NRCS	U.S. Department of Agriculture, Natural Resources Conservation Service
USDA-USFS	U.S. Department of Agriculture, U.S. Forest Service
USEPA	Environmental Protection Agency

## 2020 Geospatial Data Act Lead Covered Agency Annual Performance Report for Cadastre Theme

### Introduction to Geospatial Data Act Annual Reporting

As part of administering a National Geospatial Data Asset (NGDA) data theme, Section 756(b)(3)(E)(i) of the [Geospatial Data Act of 2018](#)<sup>1</sup> (GDA) requires a performance report to be submitted to the Federal Geographic Data Committee (FGDC). These reports document “the activities relating to and implementation of the National Geospatial Data Asset data theme, including progress in achieving the requirements under subparagraphs (A), (B), (C), and (D)” of Section 756(b)(3).

This initial self-assessment serves as the baseline report to the FGDC covering the period of October 5, 2018, with the signing of the GDA, through Fiscal Year (FY) 2020, September 30, 2020. Subsequent reports will be developed annually and will span one fiscal year period. Lead covered agencies will ensure that one consolidated report is submitted to FGDC per NGDA data theme. This report will include a rating for each responsibility of "meets expectations," "made progress toward expectations," or "fails to meet expectations," as required by the GDA. A report template was developed to facilitate consistent self-assessments and consolidated reports. A summary and evaluation of the progress to achieve the requirements will be generated by FGDC and will be provided to the National Geospatial Advisory Committee (NGAC) for comment. Summary reports with NGAC comments and responses will also become part of the biennial FGDC GDA report to Congress and will be available online.

It should be noted that the revised Circular A-16 is currently in development for release by the Office of Management and Budget (OMB) for use by the FGDC Community. The A-16 will provide direction for the FGDC on management of the GDA requirements. This reporting template may be revised for subsequent annual reports in response to revised policies or supplemental technical guidance.

### Executive Summary

This baseline annual performance report marks the transition from managing the goals and objectives of the NGDA Theme Strategic Plans as required in [OMB Circular A-16 Supplemental Guidance](#),<sup>2</sup> to establishing plans to meet the requirements of the GDA. This baseline report for the Cadastre Theme provides insights into ongoing theme strategic activities and cross-cutting FGDC portfolio management activities that align with the requirements of the GDA. In addition to activities supporting Theme Strategic Plan goals and objectives, this report covers key leadership in the areas of: managing geospatial data standards for NGDA Datasets and NGDA Themes; data population of NGDA Themes; support for strategic planning; support for user needs; and designated points of contacts responsible for implementing the NGDA Data Theme. This report has been developed using an NGDA Theme Lead consensus-driven report template that provides consistent reporting across all NGDA Themes.

### Theme Designated Points of Contact

Section 756(b)(3)(E)(i) requires lead covered agencies to “designate a point of contact within the lead covered agency who shall be responsible for developing, maintaining, coordination relating to, and disseminating data using the GeoPlatform,” as part of administering the NGDA data theme.

In accordance with the current OMB Circular A-16 Supplemental Guidance, NGDA Theme personnel play an ongoing, vital role in the operation and maintenance of a theme. They are individuals who provide

interdepartmental leadership and coordination at the NGDA Theme level and work with NGDA Dataset Managers to facilitate, among other things, portfolio development including activities associated with standards and guidance.

Traditionally, these roles have been coordinated through lead covered agencies with the FGDC Office of the Secretariat (OS) and the NGDA Theme Lead assuming a majority of NGDA Theme responsibilities. Transitioning to meet specific GDA responsibilities provides opportunities for lead covered agencies to designate specific points of contact to coordinate an expanding portfolio of datasets across the NGDA Theme and for greater dissemination of data through the GeoPlatform.

Theme and agency points of contact provided in Table 1 below are maintained to meet requirements from the [A-16 Supplemental Guidance Roles and Responsibilities](#).<sup>3</sup> This information is kept up-to-date in the [NGDA Portfolio Community Resources Site](#)<sup>4</sup> maintained for FGDC by the FGDC OS.

Cadastre Theme Contacts	
<b>Theme Lead (Co-Leads)<sup>5</sup>:</b>	Dominica VanKoten, DOI-BLM
<b>Executive Theme Champion(s):</b>	David Carter, DOI

*Table 1. Theme and Lead Covered Agency Points of Contact Involved in Theme Management.*

## NGDA Datasets in the FGDC Portfolio

The NGDA Datasets and the agencies listed in Table 2 are provided as the baseline of NGDA that currently populate the Cadastre Theme. If the theme includes NGDA Datasets managed by non-covered agencies, they are shown in bold. Support for GDA requirements by these non-covered agencies is very important to the success of the themes. The official list of [NGDA Portfolio Datasets](#)<sup>6</sup> is maintained on the GeoPlatform and is provided here [filtered by the Cadastre Theme](#).

Cadastre Theme NGDA Datasets	Agency
<b>Army Military Land Tracts (AMLT) (Pending Retirement)</b>	<b>DOD-USACE</b>

Table 2. Theme NGDA Datasets.

## FGDC Office of the Secretariat Portfolio Management Support

Portfolio Management of NGDA Themes and Datasets is coordinated through FGDC OS and is designed to consistently align NGDA Themes with the requirements of the GDA, OMB Circular A-16, and A-16 Supplemental Guidance across all NGDA Themes (as previously stated, the revised Circular A-16 has not yet been released). Transparent portfolio content is provided through NGDA Communities and NGDA Data Theme Resource Pages within the GeoPlatform (geoplatform.gov). The FGDC OS facilitates a common management approach to improve efficiency and reduce duplication of effort associated with development of methods for meeting requirements.

The following content is maintained for all NGDA Themes and the official portfolio of NGDA Datasets.

<b>Suite of NGDA Portfolio Documentation<sup>7</sup></b>
<ul style="list-style-type: none"> <li>• <a href="#">Overview</a> and <a href="#">NGDA Resources</a></li> <li>• <a href="#">NGDA Theme Community Sites</a></li> <li>• <a href="#">NGDA Theme Resource Pages</a></li> <li>• <a href="#">NGDA Meetings</a></li> </ul>

## A. Geospatial Data Standards

GDA Requirement	<p>Section 756(b)(3)(A) -- Provide leadership and facilitate the development and implementation of geospatial data standards for the National Geospatial Data Asset data theme, with a particular emphasis on a data content standard for the National Geospatial Data Asset data theme, including by—</p> <ul style="list-style-type: none"> <li>i. assessing existing standards;</li> <li>ii. identifying anticipated or needed data standards; and</li> <li>iii. developing a plan to originate and implement needed standards with relevant community and international practices— <ul style="list-style-type: none"> <li>I. in accordance with Office of Management and Budget Circular A– 119, or any successor thereto; and</li> <li>II. consistent with or as a part of the plan described in subparagraph (B);</li> </ul> </li> </ul>	
Lead Covered Agency Self-Assessment	Check One:	<input type="checkbox"/> Meets expectations <input checked="" type="checkbox"/> Made progress toward expectations <input type="checkbox"/> Fails to meet expectations
Self-Assessment Summary Comments	<p>The Cadastre Theme participated in the NGDA Baseline Standards Inventory and efforts to analyze the GDA and gather the additional information that will be used to meet requirements.</p> <p>NPS Specific Efforts:</p> <ul style="list-style-type: none"> <li>• NPS Current Administrative Boundaries GIS Data Standard  <a href="http://landsnet.nps.gov/CartographicResources/Lands_Boundary_Data_Standard.pdf">http://landsnet.nps.gov/CartographicResources/Lands_Boundary_Data_Standard.pdf</a>,  National Park Service</li> <li>• NPS Ownership Tracts GIS Data Standard  <a href="http://landsnet.nps.gov/CartographicResources/Lands_Tract_Data_Standard.pdf">http://landsnet.nps.gov/CartographicResources/Lands_Tract_Data_Standard.pdf</a>,  National Park Service</li> <li>• National Park Service Land Acquisition Procedures (Chapter 5 – Cartographic Procedures)  <a href="http://landsnet.nps.gov/level2/Lands_Only_Library/LAPS/LAPS%20Chapter%2005%20-%20Cartographic%20Procedures.pdf">http://landsnet.nps.gov/level2/Lands_Only_Library/LAPS/LAPS%20Chapter%2005%20-%20Cartographic%20Procedures.pdf</a>,  National Park Service</li> <li>• National Map Accuracy Standards  <a href="https://pubs.usgs.gov/fs/1999/0171/report.pdf">https://pubs.usgs.gov/fs/1999/0171/report.pdf</a></li> <li>• Cadastral Data Content Standard FGDC-STD-003</li> </ul> <p>The BOEM is participating in the FGDC Cadastral Subcommittee. BOEM is working to correct Metadata issues identified during the 2020 Metadata Review. The BOEM is working internally to discuss the appropriate theme location of layers, standards and consolidation of layers and adding new layers.</p>	

	<p>The BLM is conducting a pilot project to incorporate non-PLSS states into the Public Land Survey System Dataset which may cause a need for additional standards in the future.</p> <p>The USFS is developing a script to modify the JSON file so that Data.gov can consume our dataset ISO.xml file and have all the appropriate elements that are currently missing. This is an interim measure until ESRI can address the deficiency in the DCAT Configuration Hub Tool. The deployment of the script is expected in April 2021.</p>
--	---

Table 4. GDA Section 756(b)(3)(A) Requirements and Self-Assessment Criteria.

## NGDA Baseline Standards Inventory

FGDC conducted an NGDA Baseline Standards Inventory capturing details about all 173 NGDA Datasets across the 18 NGDA Themes. The inventory was generated using an online survey, which establishes an updateable, repeatable process. This section reflects data that was input between August 31 and February 8, 2021. An [FGDC NGDA Summary Dashboard](#)<sup>8</sup> reflecting the inventory results is publicly available and allows users to sort by Theme and Department/Agency.

Accomplishing the baseline inventory represents progress towards meeting the GDA requirements for “assessing existing standards.” The details collected on current use will facilitate the assessment of necessary data and metadata standards, schema, and classifications in order to identify needed standards and facilitate nationwide population of the NGDA data theme to meet the needs of users.

An [NGDA Baseline Standards Inventory Companion Guide](#)<sup>9</sup> was developed to document the process and establish a comprehensive list of categories, definitions, and identified standards, including existing FGDC Endorsed Standards. The survey allowed NGDA Dataset Managers to provide consistent input from a set of picklists and to also contribute other standards in use or under consideration.

A significant effort, the inventory meets several requirements of the GDA, the [Federal Data Strategy 2020 Action Plan](#)<sup>10</sup> for Action 10, and [Foundations for Evidence-Based Policymaking Act of 2018](#).<sup>11</sup> It also furthers the 2018 President’s Management Agenda goal of “data, accountability, and transparency to provide the tools to deliver visibly better results to the public and hold agencies accountable...”

## Inventory Status

The following table indicates the baseline standards inventory completion status for NGDA Datasets within the Theme.

Cadastre Theme Baseline Standards Inventory Status	
	All NGDA Dataset Managers or their designees within the Theme have completed the NGDA Baseline Standards Inventory.
✓	Some NGDA Dataset Managers or their designees within the Theme have completed the NGDA Baseline Standards Inventory.
	No NGDA Dataset Managers or their designees within the Theme have completed the NGDA Baseline Standards Inventory.

Table 5. Status of NGDA Baseline Standards Inventory for the Theme.

### NGDA Datasets Not Included in the Baseline Standards Inventory

The following table provides insight into why some NGDA Datasets within the Theme did not complete the baseline standards inventory.

NGDA Title	Brief Explanation for Not Participating
BIA Indian Lands Dataset (Indian Lands of the United States)	Dataset archived or longer maintained. See AIAN-LAR.
BLM National Surface Management Agency Withdrawal Area Polygons ( <i>Pending Approval</i> )	NGDA Dataset is pending DOI approval.
BLM National Surface Management Agency Special Public Purpose Withdrawal Area Polygons ( <i>Pending Approval</i> )	NGDA Dataset is pending DOI approval.
American Indian and Alaska Native Land Area Representation (AIAN-LAR) ( <i>Pending Approval</i> )	NGDA Dataset is pending DOI approval.

*Table 5a. NGDA Datasets Not Included in the NGDA Baseline Standards Inventory.*

### Initial Inventory Results

The preliminary results of the NGDA Baseline Standards Inventory provided in Figure 1 show a summary of the geospatial data and metadata standards in use by the Cadastre Theme. Figure 2 shows the categories of standards associated with the datasets in the theme.

An assessment of the existing, anticipated, or needed standards per the GDA has not been undertaken yet within the FGDC NGDA Portfolio. The information collected during the baseline inventory will be analyzed and used in the future to assess these needs and develop “a plan to originate and implement needed standards with relevant community and international practices.” Therefore, the statistical information provided in Figures 1 and 2 is not a reflection of standards required to support the data within this theme.

Milestone Summary Statistics: Tracking NGDAs for Implementation of Standards		
Theme - Cadastre		
Standards Reported for 17 of 19 NGDA		
	Metadata Standards	Data Standards
NGDA Using Standards	17	7
Percent Using Standards	100%	41.2%
NGDA with No Standards	0	10
Percent with No Standards	0%	58.8%

Figure 1. This graphic provides the counts for metadata and data standards associated with the NGDA theme datasets reported in the NGDA Baseline Standards Inventory as of February 8, 2021.

Milestone Summary Statistics: Tracking NGDAs for Implementation of Standards			
Theme - Cadastre			
Standards Categories for 17 of 19 NGDA			
Metadata	Structure	Attribute	Accuracy
17 (100% of 17 NGDA)	5 (29.4% of 17 NGDA)	5 (29.4% of 17 NGDA)	5 (29.4% of 17 NGDA)
Quality	Archive	Exchange	Service
5 (29.4% of 17 NGDA)	4 (23.5% of 17 NGDA)	4 (23.5% of 17 NGDA)	4 (23.5% of 17 NGDA)

Figure 2. This graphic provides the counts for categories of standards associated with the NGDA theme datasets as reported in the NGDA Baseline Standards Inventory as of February 8, 2021.

## Methods Used by NGDA Agencies to Promote Standards for NGDA Datasets

Activities that directly support active participation or efforts by agencies to “provide leadership and facilitate development and implementation of standards associated with NGDA Datasets within the theme” include participation in subcommittees, working groups, international and national voluntary consensus standards bodies, international geospatial working groups supporting standards, and other federal and non-federal collaboration.

### FGDC Subcommittees and Working Groups Associated with the Cadastre Theme

[FGDC Subcommittees and Working Groups](#)<sup>12</sup> were established by FGDC to facilitate standards use for datasets within the Theme. In response to the requirements of the GDA, the FGDC is revisiting the current governance structure pending guidance from the revised OMB Circular A-16. When the revised FGDC structure is established, an efficient and streamlined chartering process will need to be developed. Until that time, FGDC subcommittees and working groups continue to operate under their current charters where they exist.

FGDC Subcommittees and Working Groups Associated with the Cadastre Theme	Agencies Participating
National Boundaries Group	<a href="#">Participating Agencies</a>
Federal Lands Working Group	<a href="#">Contacts</a>
FGDC Cadastral Subcommittee	<a href="#">Members</a>
Metadata Working Group	<a href="#">Members</a>
FGDC Standards Working Group	<a href="#">Contacts</a>

*Table 6. Subcommittees and Working Groups Associated with the Theme.*

### National and International Voluntary Consensus Standards Body Participation

Agencies participate in the development, management and use of standards at both the national and international level. Examples include the International Committee for Information Technology Standards L1 Geographic Information Systems (INCITS L1), Open Geospatial Consortium (OGC), International Standards Organization (ISO), ISO/Technical Committee 211 Geographic information/Geomatics (ISO/TC 211). These groups are comprised of national representatives that devise and update geospatial standards. In turn, these standards are then adopted and implemented by the agencies. Engagement with these standards bodies ensures that agencies have the opportunity to provide input into the standards development and change management processes to facilitate adoption.

National and International Voluntary Consensus Standards Bodies Groups Associated with the Cadastre Theme	Agencies Participating
BOEM participates in The U.S. Board on Geographic Names (BGN) <a href="https://www.usgs.gov/core-science-systems/ngp/board-on-geographic-names/domestic-names">https://www.usgs.gov/core-science-systems/ngp/board-on-geographic-names/domestic-names</a>	BOEM, DOC, DOI, Dept. of Agriculture, CIA, DOD, NGIA
BOEM participates in the: Committee on Domestic Names and the Committee on Undersea Features (ACUF)	
BOEM participates in the Committee for the Marine Transportation System (CMTS) <a href="https://www.cmts.gov/topics/maritime_data">https://www.cmts.gov/topics/maritime_data</a>	BOEM, USCG, NOAA, DOD, USACE, EPA and MARAD
BOEM participates in the Alaska Mapping Executive Committee Coastal Subcommittee (AMEC CS) <a href="https://www.usgs.gov/core-science-systems/ngp/user-engagement-office/alaska-mapping-executive-committee">https://www.usgs.gov/core-science-systems/ngp/user-engagement-office/alaska-mapping-executive-committee</a>	NOAA, USGS, BLM, BOEM, FWS, Dept. of Ag., DOD, DHS, USDOT, EPA, FAA, FEMA, NGA, NSF, USFS, USACE, NPS, BIA
BOEM participates in the Interagency Working Group on Ocean and Coastal Mapping (IWG-OCM): <a href="https://iocm.noaa.gov/about/iwg-ocm.html">https://iocm.noaa.gov/about/iwg-ocm.html</a>	NSTC, SOST, NOAA, BOEM, EPA, NASA, FEMA, U.S. Navy, NGA, NPA, NRCS, NSF, ODNI, Smithsonian, USACE, USARC, USCG, USFS, USFWS, USGS

Table 7. National and International Voluntary Consensus Standards Bodies Associated with the Theme.

### International Geospatial Working Groups Supporting Standards

Agencies also participate in international geospatial working groups supporting standards (e.g. the United Nations Global Geospatial Information Management (UN-GGIM), International Hydrographic Organization (IHO), Group on Earth Observations (GEO), etc.). These groups ensure that the geospatial standards are adopted homogeneously and provide the opportunity for international collaboration to resolve issues. These groups also support implementation of standards.

International Geospatial Organizations Supporting Standards Groups Associated with the Cadastre Theme	Agencies Participating
BOEM participates in the S-121 Maritime Limits and Boundaries <a href="http://s100.iho.int/S100/product%20specification/division-search/s-121-maritime-limits-and-boundaries">http://s100.iho.int/S100/product%20specification/division-search/s-121-maritime-limits-and-boundaries</a>	Australia Canada France Netherlands Republic of Korea Sweden United Kingdom of Great Britain and Northern Ireland United States of America

Table 8. International Geospatial Organizations Supporting Standards Associated with the Theme.

### Other Activities Undertaken by Agencies to Support Standards

In addition to the organizations cited above, the implementation of standards for data within the Cadastre Theme is supported through collaboration and engagement with agency teams, other federal and non-federal organizations, and/or participation in interagency groups, training programs, or other activities as highlighted below.

Description of Other Activities Undertaken to Support Standards	Agencies Participating
National Spatial Reference System 2022 (NSRS) <a href="https://oceanservice.noaa.gov/facts/nsrs.html">https://oceanservice.noaa.gov/facts/nsrs.html</a>	BOEM, DOC, DOI, Dept. of Agriculture, DOD, NGA
Standard Ocean Mapping Protocol (SOMP) Working Group <a href="https://iocm.noaa.gov/standards/ocean-mapping-protocol.html">https://iocm.noaa.gov/standards/ocean-mapping-protocol.html</a>	NSTC, SOST, NOAA, BOEM, EPA, NASA, FEMA, U.S. Navy, NGA, NPA, NRCS, NSF, ODNI, Smithsonian, USACE, USARC, USCG, USFS, USFWS, USGS
The Coastal and Marine Ecological Classification Standard (CMECS) <a href="https://iocm.noaa.gov/standards/cmecs-home.html">https://iocm.noaa.gov/standards/cmecs-home.html</a>	BOEM, NOAA
Norwegian Royal Ministry of Petroleum and Energy (MOU) – Knowledge Exchange	BOEM, Norway
National Ocean Mapping, Exploration, and Characterization (NOMECE) Council	NSTC, NOAA, USGS, BOEM

Table 9. Other Activities within the Theme that Support Standards.

## B. Nationwide Population of the Data Theme

GDA Requirement	<p>Section 756(b)(3)(B) provide leadership and facilitate the development and implementation of a plan for nationwide population of the National Geospatial Data Asset data theme, which shall—</p> <ul style="list-style-type: none"> <li>(i) include developing partnership programs with States, Indian tribes, institutions of higher education, private sector entities, other Federal agencies, and local governments;</li> <li>(ii) meet the needs of users of geospatial data;</li> <li>(iii) address human and financial resource needs;</li> <li>(iv) identify needs relating to standards, metadata for geospatial data within the National Geospatial Data Asset data theme, and the GeoPlatform; and</li> <li>(v) expedite the development of necessary National Geospatial Data Asset data themes;</li> </ul>	
Lead Covered Agency Self-Assessment	Check One:	<input type="checkbox"/> Meets expectations <input checked="" type="checkbox"/> Made progress toward expectations <input type="checkbox"/> Fails to meet expectations
Self-Assessment Summary Comments	<p>The NPS made progress towards expectations in this requirement both internally and by working with the Federal Geographic Data Committee (FGDC) National Boundaries Group (NBG) and Federal Lands Working Group (FLWG).</p> <p>The BOEM reached out to the Cadastre Theme Lead and setup monthly meetings. BOEM is participating in the FGDC Cadastral Subcommittee and the Federal Geodetic Control Subcommittee. The BOEM is working to correct Metadata issues identified during the 2020 Metadata Review. The BOEM is working internally to discuss the appropriate theme location of layers, standards and consolidation of layers and adding new layers.</p>	

	<p>The BLM is working to clarify and document data submission requirements for the Surface Management Agency data submitted by the BLM state offices and reviewing the current SMA dataset for update and maintenance needs.</p> <ol style="list-style-type: none"> <li>1. The BLM recently hired a full time SMA Data Steward to work with the BLM National Operations Center (NOC) and other partners to increase data availability and integrity.</li> <li>2. Conducted internal coordination to identify and correct areas of overlap.</li> <li>3. Instituted a plan to regularly meet and resolve the major data issues in the SMA before the end of FY 2021, develop communication protocols to accomplish the goal, and identify correct personnel to communicate with. This will allow a more complete boundary adjudication effort and reduce topology errors between datasets.</li> </ol> <p>The BLM Public Land Survey System dataset activities:</p> <ol style="list-style-type: none"> <li>1. The BLM recently hired a full time Headquarters PLSS Dataset Manager to work with the BLM National Operations Center (NOC) and BLM State Offices to increase data availability and integrity.</li> <li>2. Provided updates to the PLSS (CadNSDI) Dataset quarterly. Instituted regularly scheduled meetings with BLM State Offices and the NOC to better meet goals and identify potential problems and implement corrective actions.</li> </ol> <p>The DOD is making steady process on its parcel mapping and is coordinating with the Federal Lands Working group on data transfer.</p>
--	--

*Table 10. GDA Section 756(b)(3)(B) Requirements and Self-Assessment Criteria.*

Prior to the establishment of the GDA, the OMB Circular A-16 Supplemental Guidance directed FGDC to establish management practices for the NGDA portfolio and to adopt and implement a coordinated and effective Federal geospatial asset management capability. In response, FGDC agencies developed documented portfolio management processes that included establishment of Theme Strategic Plans, Implementation Plans, and documentation of other efforts, such as the Lifecycle Maturity Assessments conducted on all NGDA Datasets.

This suite of processes and documentation provides a foundation for future development of the plan for “nationwide population of the NGDA data theme.” This report section will provide elements from the Strategic Plans and citations to efforts that relate to meeting requirements under subparagraph B.

## NGDA Datasets in the FGDC Portfolio

The NGDA Datasets and the managing covered agencies that currently populate the Cadastre Theme are provided in *Table 2 Theme NGDA Datasets*.

## Partnership Programs

This section provides a list of partners and partnership programs that are in place to support datasets in the Cadastre Theme. Partnerships may provide insights to ensure available data meet the needs of users, identify or assist with justifications to ensure that human and financial resource needs are met, and provide additional information on standards for geospatial data and metadata, which have been

covered in Section B above. Provided here is a list of “groups involved in the geospatial community” found in the GDA, Section 754(b)(C).

- Other Federal agencies
- States
- Local governments
- Regional governments
- Tribal governments
- Private sector entities
- Geospatial information user industries
- Professional associations
- Scholarly associations
- Nonprofit organizations
- Academia
- Licensed geospatial data acquisition professionals

## Lifecycle Maturity Assessments

FGDC agencies developed the [Stages of the Geospatial Data Lifecycle](#)<sup>13</sup> as supplemental guidance supporting the original OMB Circular A–16. The matrix was established for agency use when developing, managing and reporting on NGDA Datasets.

The NGDA Lifecycle Maturity Assessment (LMA) process is based on those seven stages and was developed to document and support the lifecycle-based geospatial portfolio management of NGDAs. This approach is defined in [OMB Circular A-16 Supplemental Guidance](#), and the stages are consistent with the approach for Federal agency information asset management improvement outlined in [OMB Circular A-130](#).<sup>14</sup>

The lifecycle matrix establishes a framework of standard terminology and processes for seven Geospatial Data Lifecycle stages (see Figure 3). The stages associated with the data lifecycle are meant to allow stakeholders to assess whether NGDA data production activities meet business requirements and utilize best practices that enable shared or common services. The Geospatial Data Lifecycle is not intended to be rigidly sequential or linear. Quality assurance and (or) quality control (QA/QC) functions for data should be included at every stage of the Geospatial Data Lifecycle. Business requirements drive what needs to occur at each stage. This concept is illustrated in Figure 3 by the purple arrows that point from the business requirements circle to each lifecycle stage. The orange arrows that point to the business requirements circle represent the feedback loop that needs to occur at each stage to reassess the business requirements.

*Figure 3. OMB Circular A-16 Supplemental Guidance – lifecycle stages for developing, managing, and reporting on nationally significant datasets to meet business requirements.*

The expected outcomes of adopting this lifecycle management framework include:

- Timely and high-quality geospatial data to support business processes and operations.
- Stronger partnerships across all levels of government and, when appropriate, the private sector, to increase cost efficiency and return on investment; and
- Improved strategies for completing and maintaining nationally significant themes and datasets associated with OMB Circular A–16 to enhance services to citizens.

Lifecycle Maturity Assessments were conducted in 2015 and 2017 and resultant [Theme LMA Summary Reports](#)<sup>15</sup> and Dashboards are available online through GeoPlatform.gov. While the LMA process was put on hold for 2019 following the enactment of the GDA, it is seen as a key component moving forward and will be analyzed as part of developing and implementing the plan for nationwide population of the NGDA data themes.

## C. Establish Actions That Support the Goals and Objectives in NSDI Strategic Plan

GDA Requirement	Section 756(b)(3)(C) establish goals that support the strategic plan for the National Spatial Data Infrastructure prepared under section 755(c);	
Lead Covered Agency Self-Assessment	Check One:	<input type="checkbox"/> Meets expectations <input checked="" type="checkbox"/> Made progress toward expectations <input type="checkbox"/> Fails to meet expectations
Self-Assessment Summary Comments	<p><b>Goal 1</b>—Implement the National Geospatial Policy and Governance Framework as Defined by the Geospatial Data Act and Related Statutes and Policies Objective. The Cadastre theme is participating in the governance framework through the FGDC and opportunities to comment on draft policies as they are being developed.</p> <p><b>Goal 2</b>—Advance the Maturity of, Accelerate the Acquisition of, and Expand the Sources of National Geospatial Data Assets (NGDA) To Ensure That They Are Findable, Accessible, Interoperable, and Reusable The Cadastre Theme is participating in this goal by collaborating through FGDC subcommittees, working groups and other partner groups. In addition, the theme strategic plan will be updated in the near future to incorporate specific future activities.</p> <p><b>Goal 3</b>—Ensure Open Standards-Based Interoperability To Enable Geospatial Shared Services The Cadastre Theme is participating in this goal by collaborating through FGDC subcommittees, working groups and other partner groups. In addition, the theme strategic plan will be updated in the near future to incorporate specific future activities.</p> <p><b>Goal 4</b>—Enable and Promote Collaborative Governance and Partnerships To Meet National Needs, Priorities, and Circumstances The Cadastre Themes Collaborates through various working groups and subcommittees including chairing the cadastral subcommittee.</p>	

Table 12. GDA Section 756(b)(3)(C) Requirements and Self-Assessment Criteria.

All FGDC NGDA data themes lead covered agencies are making progress toward the requirement to “establish goals that support the strategic plan for the National Spatial Data Infrastructure prepared under section 755(c).” FGDC developed and released a new national strategic plan for the development of the National Spatial Data Infrastructure (NSDI) [GDA Sec. 755(c)], which was approved by the FGDC Steering Committee in November 2020. Covered Agency Geospatial Strategies [GDA Sec. 759(a)(1)], which will support the goals in the NSDI strategic plan, are due to be completed and submitted for agency approval by February 26, 2021, per FGDC guidance. For more information on the NSDI Strategic Plan, please visit <https://fgdc.gov/nsdi-plan>.

As part of the requirements under Circular A-16 Supplemental Guidance, FGDC NGDA data themes have managed goals and objectives as part of their Strategic Plans. The existing [Cadastre Theme Strategic Plan](#) is located within the NGDA Portfolio Community.

In FY21, lead covered agencies, covered agencies, and NGDA Portfolio Management staff will initialize efforts to develop updated NGDA Theme Plans that will include actions that support the goals and objectives of the NSDI Strategic Plan and are in compliance with the GDA.

## D. Addressing User Needs

GDA Requirement	Section 756(b)(3)(D) as necessary, collect and analyze information from users of geospatial data within the National Geospatial Data Asset data theme regarding the needs of the users for geospatial data and incorporate the needs of users in strategies relating to the National Geospatial Data Asset data theme;	
Lead Covered Agency Self-Assessment	Check One:	<input type="checkbox"/> Meets expectations <input checked="" type="checkbox"/> Made progress toward expectations <input type="checkbox"/> Fails to meet expectations
Self-Assessment Summary Comments	<p>The BOEM is participating in the FGDC Cadastral Subcommittee and the Federal Geodetic Control Subcommittee. BOEM is working to correct Metadata issues identified during the 2020 Metadata Review. The BOEM is working internally to discuss the appropriate theme location of layers, standards and consolidation of layers and adding new layers.</p> <p>The NPS made progress towards expectations by continuing to provide and refine data/metadata downloads, and web map services for users which are updated quarterly.</p> <p>The BLM performed internal coordination through outreach to our state offices, as well as other federal agencies. The purpose of the outreach was to identify and establish connections with data stewards and known and new data users, as well as identify ways to increase data updates, reporting standards, and accuracy.</p> <p>The BLM conducted a pilot with their Eastern States Office to create a PLSS data scheme for non-PLSS states.</p> <p>The BLM is developing the BLM Mineral and Records System (MLRS) which uses the PLSS dataset for mapping functionality.</p>	

Table 13. GDA Section 756(b)(3)(D) Requirements and Self-Assessment Criteria.

Multiple activities are underway across FGDC agencies and other organizations to collect and analyze user needs information. Appendix A includes an array of relevant geospatial data use cases gathered by FGDC for future analysis as part of the “development and implementation of a plan for nationwide population of the National Geospatial Data Asset data theme.”

The ultimate goal will be to establish a collection of NGDA use cases, user needs assessments, and other activities that highlight how strategies, goals, and objectives for the NGDA data theme are being supported, and that demonstrate the diversity of users and their needs.

In addition to Appendix A, the table below provides references and links (if available) to theme-specific use cases, user needs assessments, workshops, and summits that document ongoing efforts by agencies to understand and meet user needs in the delivery of geospatial data within this theme.

Cadastre Theme Use Cases, User Needs Assessments, Workshops and/or Summits	Participating Covered Agencies
Develop and post videos and documentation related to offshore marine cadastral data content and standards.	BOEM, NOAA
<p>Strategic Plans</p> <p>Implementation Plan for the National Strategy for Ocean Mapping, Exploring, and Characterizing the United States Exclusive Economic Zone, January 2021.</p> <p>Office Of Coast Survey Contributions to a National Ocean Mapping Strategy, August 2020.</p> <p>National Strategy for Mapping, Exploring, and Characterizing the U.S. Exclusive Economic Zone, June 2020.</p> <p>A Strategy for Mapping the Arctic and Sub-Arctic Shoreline and Nearshore of Alaska, June 2020.</p> <p>Recommendations for Increasing the Efficiency of Permitting for Ocean Exploration, Mapping, and Research Activities, June 2020.</p> <p>National Coastal Mapping Strategy 1.0: Coastal LIDAR Elevation for a 3D Nation, IWG-OCM, November 2018.</p> <p>Federal Geographic Data Committee Elevation Theme Strategic Plan, September 26, 2016.</p> <p><a href="https://iocm.noaa.gov/about/strategic-plans.html">https://iocm.noaa.gov/about/strategic-plans.html</a></p>	NOAA, BOEM

[NGAC Use Cases](#)

[HIFLD Use Cases](#)

[GDA Communications Working Group Use Cases](#)

[Joint HIFLD/GeoPlatform Feedback Sessions](#)

[Other Types of User Feedback and Use Cases](#)

## Introduction

GDA Section 756(b)(3)(D) calls for “as necessary, collect and analyze information from users of geospatial data within the National Geospatial Data Asset data theme regarding the needs of the users for geospatial data and incorporate the needs of users in strategies relating to the National Geospatial Data Asset data theme.” As noted in the Lead Covered Agency (LCA) NGDA Theme Annual Performance Report, multiple activities are underway across FGDC, its agencies, and other organizations to collect and analyze user needs information. Use cases summarize both broad and specific user requirements and application of geospatial data in addressing those needs, including the use of NGDA Datasets.

In support of Section 756(b)(3)(D) requirements, existing use cases that may be relevant for NGDA datasets have been gathered and compiled from multiple sources as documented in this Appendix. These existing use cases will be evaluated for use as resources for the themes, and planning to meet GDA requirements for future plan development. Additionally, others not included in this resource list may also be included in the LCA reports.

## Federal Data Strategy Use Cases

Resources.data.gov was originally launched in July 2019 as an effort by the Office of Management and Budget, the Office of Government Information Services of the National Archives, and the General Services Administration to provide an online repository of guidance and tools to implement the OPEN Government Data Act and the Federal Data Strategy. Below is a selection of articles, use cases, and proof points describing projects undertaken by data managers and data practitioners across the federal government.

- [Agencies Mobilize to Improve Emergency Response in Puerto Rico through Better Data](#)
- [Department of Transportation Case Study: Enterprise Data Inventory](#)
- [Department of Transportation Model Data Inventory Approach](#)
- [FEMA Case Study: Disaster Assistance Program Coordination](#)
- [Helping Baltimore Volunteers Find Where to Help](#)
- [How USDA Linked Federal and Commercial Data to Shed Light on the Nutritional Value of Retail Food Sales](#)
- [Improving Data Access and Data Management: Artificial Intelligence-Generated Metadata Tags at NASA](#)
- [Investing in Learning with the Data Stewardship Tactical Working Group at DHS](#)
- [Open Energy Data at DOE](#)

- [Supercharging Data through Validation as a Service](#)
- [The Veterans Legacy Memorial](#)
- [U.S. Geological Survey and U.S. Census Bureau collaborate on national roads and boundaries data](#)

## NGAC Use Cases

The purpose of the National Geospatial Advisory Committee (NGAC) Use Cases was to develop materials and messages that tell the story of the critical importance of geospatial data, information, and tools to our Nation. These use cases were incorporated into the GDA report to Congress submitted in October 2020.

- [North Carolina Flood Mapping Program](#)
- [Oregon Foster Care Initiative](#)
- [Response Outreach Area Mapper \(ROAM\) Project](#)
- [National Opioid Crisis](#)
- [Topeka, Kansas Pavement Management Program](#)

## HIFLD Use Cases

The FGDC Homeland Infrastructure Foundation-Level Data (HIFLD) Subcommittee is responsible for developing, promoting, and executing a coordinated strategy for acquisition and/or enhancement of homeland infrastructure geospatial information for HIFLD mission partners. To foster collaboration and understanding of how the HIFLD Open and Secure datasets are being used to support federal/state/local officials and non-governmental partners across the Homeland Defense (HD), Homeland Security (HLS), National Preparedness – Prevention, Protection, Mitigation, Response and Recovery (NP-PPMR&R) mission communities, the following real-world examples – “use cases” – were gathered in 2018 and 2020.

Although not exhaustive, these examples represent HIFLD’s significant impact to a wide range of uses and essential missions. Many of these use cases involve NGDA Datasets, in addition to other mission-specific datasets needed by the community. The 2020 document, which also includes the 2018 use cases, can be accessed at the following link:

<https://gii.dhs.gov/hifld/sites/default/files/2020-05/FGDC%20HIFLD%20Use%20Cases%202020.pdf>

## GDA Communications Working Group Use Cases

The FGDC GDA Communications Working Group created a template and a suite of use cases to provide examples of steps agencies can take to mature their geospatial programs to support their mission needs. Some are based on applied efforts and others are thoughtful considerations as discussed by the Communications Working Group. While the use cases are mission focused, they also provide traceability to the GDA and the 13 Covered Agencies responsibilities. These use cases serve as idea generators for GDA compliance. Once these templates are available on a public website, the link will be provided.

## Joint HIFLD/GeoPlatform Feedback Sessions

The FGDC HIFLD Subcommittee organizes annual Joint HIFLD/GeoPlatform Feedback Sessions for the communities to collaborate and share uses, mission requirements, and other feedback. Topics often include general focus areas such as data management, metadata, tools, and demonstrations, and ‘deep dives’ into mission area uses such as transportation, healthcare, or natural disasters. The information

shared and discussed during these presentations and breakout sessions often involve NGDA Datasets. The proceedings from these meetings are posted online for review.
